- ▶ Heats up to 200 sq.mtr*
- ► Large glass viewing area (460 x 260mm)
- ► Single rod draft control
- Strong bakelite handles
- Steel firebox with firebrick lining
- Airwash system
- Cast iron cook top
- ▶ Power output: 10 kW Emissions: 0.5 g/kg
- ▶ 450mm log length
- Overnight burn**

OPTIONS

- 8mm steel baffle
- Cast iron liners

CARDINIA CAST IRON COOK TOP

* Varies depending on home floor plan, house layout, heat loss of the house and quality/moisture content of wood. **6-8 hours average burn time varies depending on fuel and loading.

REGENCY RENMARK

Its contemporary design and large viewing area sets the Renmark apart from traditional freestanding wood fires. This convection heater, with optional 2-speed fan, is designed for medium sized living areas and can easily heat up to 250 sq.mtr.

STANDARD FEATURES

- Heats up to 250 sq.mtr*
- ► Large glass viewing area (460 x 260mm)
- Single rod draft control
- Strong bakelite handles
- Steel firebox with firebrick lining
- 15 Year firebox warranty
- Airwash system
- ▶ Power output: 11 kW Emissions: 0.5 g/kg
- ▶ 450mm log length
- Overnight burn**

OPTIONS

- 2-speed thermostatically controlled fan
- 8mm steel baffle
- Cast iron liners

* Varies depending on home floor plan, house layout, heat loss of the house and quality/ moisture content of wood.
** 6-8 hours average burn time varies depending on fuel and loading.

REGENCY ALBANY

The Albany sets the standard for the industry's most reliable, well-constructed freestanding wood fire; providing beautiful wood heat to a large living area of 200 - 240 sq.m*. Load wood front-to-back or side-to-side for optimum convenience, then sit back and enjoy the warmth.

STANDARD FEATURES

- Heats up to 250 sq.mtr*
- ► Large glass viewing area (460 x 260mm)
- Single rod draft control
- Strong bakelite handles
- Steel firebox with cast iron lining
- ▶ 15 Year firebox warranty

- 8mm steel baffle
- Airwash system
- Powerful 3-speed thermostatically controlled fan
- Power output: 11 kW Emissions: 0.5 g/kg
- ▶ 450mm log length
- Overnight burn**

REGENCY ALTERRA MEDIUM WOOD FIRE

A wood burning stove with modern appeal! The contemporary design of Regency's Alterra wood stove puts the focus on the brilliant glowing fire. With an impressive viewing area, and a convenient firewood storage area, the Alterra is perfectly proportioned for visual pleasure and functional convenience.

STANDARD FEATURES

- ▶ Heats up to 250 sq.mtr*
- ► Large glass viewing area (460 x 260mm)
- ► Single rod draft control
- Strong bakelite handles
- Steel firebox with firebrick lining
- Airwash system
- > 2-speed thermostatically controlled fan
- ▶ Power output: 11 kW Emissions: 0.5 g/kg
- ▶ 450mm log length
- Overnight burn**
- Black side panels

OPTIONS

- Stainless steel side panels
- ▶ 8mm steel baffle
- Cast iron liners

REGENCY BONDI

Designed for modern living, the Bondi Wood Heater adapts effortlessly to any space. Choose the sleek stacker with its concealed storage and sliding door for a clean, minimalist look. Prefer a bold statement? The wide bench option adds a striking focal point to any room. Or go fully custom with a base that fits your customers unique style.

With optional fan integration in the stacker and bench configurations—or a streamlined, fan-free installation—the Bondi delivers warmth and ambiance exactly how you want it. Give your customers more choices, more style, and more ways to create the perfect space.

STANDARD FEATURES

- ▶ Heats up to 250 sq. mtr*
- ► Large black frit glass viewing area for contemporary styling
- ▶ Power output: 11kW Emissions: 0.5 g/kg
- ► Cast Iron lined steel firebox
- ▶ 8mm Steel Top Baffle
- 15 year limited warranty
- Automated Airwash system
- ▶ 450mm log length
- Overnight burn**

OPTIONS

- Stacker base including sliding front door and 2 speed thermostatically controlled fan
- Side stacker including sliding front door can be used either left or right side
- ► Wide bench (1280mm) including 2 speed thermostatically controlled fan
- Low base without fan
- Leg base without fan

REGENCY WINDSOR

Choose the Windsor and bring the wood fire warmth to your home. Perfect for heating large living areas up to 260 sq.mtr., this wood fire has all the modern conveniences - efficient heat, an optional ash drawer, and easy operation; while keeping up with tradition.

STANDARD FEATURES

- ▶ Heats up to 260 sq.m*
- Large glass viewing area (380 x 215 mm)
- ► Front mounted air adjustment
- High performance brick-lined firebox (base & sides) reflects heat
- ► Cast iron legs in black
- Cast iron arched door in black
- ▶ Power output: 9.4 kW Emissions: 1.3 g/kg
- 400mm log length
- Overnight burn**

OPTIONS

- > 2-speed thermostatically controlled fan
- Convector airmate
- Ash drawer
- Outside air kit

REGENCY HAMILTON

STANDARD FEATURES

- ▶ Heats up to 260 sq.mtr*
- Large glass viewing area (380 x 215 mm)
- ▶ Front mounted air adjustment
- High performance brick-lined firebox (base & sides) reflects heat
- Contemporary cast iron door
- Power output: 9.4 kW Emissions: 1.3 g/kg
- ▶ 400mm log length
- Overnight burn**

OPTIONS

- ► 2-speed thermostatically controlled fan
- ► Convector airmate
- Ash drawer
- Outside air kit

* Varies depending on home floor plan, house layout, heat loss of the house and quality/moisture content of wood. ** 8-10 hours average burn time varies depending on fuel and loading.

REGENCY HUME

STANDARD FEATURES

- Heats up to 320 sq.mtr*
- ► Large glass viewing area (575 x 275mm)
- ► Single rod draft control
- Strong bakelite handles
- ► Steel firebox with cast iron lining & a firebrick base
- 8mm steel baffle

- Airwash system
- Powerful 3-speed fan
- Power output: 13 kW

Specifications (MM)

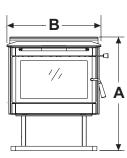

SPECIFICATIONS	Narrabri	Cardinia	Renmark	Alterra	Albany	Hume	Gosford	Windsor/ Hamilton	Bondi
Heating capacity	up to140 m ²	up to 200 m ²	up to 250 m ²	up to 250 m ²	up to 250 m ²	up to 320 m ²	up to 350 m ²	up to 260 m ²	up to 250 m ²
Efficiency	67%	69%	69%	70%	70%	65%	65%	63%	70%
Emissions (g/kg)	1.4	0.5	0.5	0.5	0.5	1.5	1.5	1.3	0.5
Average heat output (kW)	7.8	10	11	11	11	13	13	9.4	11

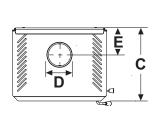

Where fitted thermostatically controlled fans do not activate until fire heats up and may take 20-30 mins.

NOTE: Heating capacity and any burn times are a guide only and can be affected by some or all of the following examples: home floor plan, house layout, heat loss of the house and quality/moisture content of wood.

Heating capacities are based on cooler Australian climate areas – warmer geographical locations within Australia such as Queensland, Northern NSW and Western Australia should factor an increase in unit heating area.

This is a guide - specifications based on the current model at time of publishing. Always refer to the data plate for unit specific details.

ENJOY YOUR REGENCY — FOR LIFE

You'll be happy with your Regency for years to come, our 15 years Limited Warranty guarantees it. Not only have we invested in quality workmanship, the finest materials and durable heavy-duty construction but we have carefully selected a dealer network that is committed to your satisfaction. All Regency wood fires exceed stringent Australian testing standards. We know that you will be as proud of your Regency as we are.

NOTE: All product specifications are subject to change without notice. Before installing refer to the relevant product manual for full and up to date information. Heating capabilities of units are affected by: drafts under doorways or through flooring, large glass areas not covered by heavy drapes, ceiling heights greater than 2.4m or cathedral type ceilings, poor or no insulation and geographical locations.

Burning Wood - A Green Choice

WOOD IS AFFORDABLE

Reduce your dependence on high priced, non-renewable home heating fuels by burning wood. Turn your fire down and enjoy comforting warmth in your main living area with a Regency wood product. Whether you buy your wood or collect it yourself, you will notice the savings within its first year.

RENEWABLE RESOURCE

Wood is a renewable natural resource - well-managed forests are a renewable, sustainable source of energy that helps us reduce greenhouse gas emissions and be less dependent on oil & gas.

WOOD IS CARBON NEUTRAL

As trees grow they absorb carbon dioxide from the atmosphere. When trees die and are left to decompose in the forest or burn in forest fires the carbon stored in the trees is released in the atmosphere as carbon dioxide. Burning firewood produces the same amount of carbon dioxide as it has absorbed during its life cycle - making wood burning carbon neutral.

CERTIFIED

All Regency Wood Stoves and Fireplaces have been tested and certified to the strictest Australian Clean Air Standards.
